Muhammad Askari

has successfully completed the online Specialization

Software QA & Test Automation Engineering

Master comprehensive QA automation through hands-on experience with industry-leading testing tools and methodologies. This specialization covers Selenium web automation, agile QA processes, open-source testing frameworks (Cypress, JMeter, xUnit), advanced Cypress techniques, and API validation with Postman. You'll progress from basic automation scripts to designing scalable test architectures, implementing performance testing, and validating APIs in real-world scenarios, preparing you for modern QA engineering roles.
